canon d320 user manual

In the event of major changes in the contents of this manual, Canon will issue a new editions of this manual. Mark Meaning States a precaution to be taken to prevent danger to personnel, damage to the product, or damage to electronic components by discharge of static electricity. Each of the above parts is further divided into the following four chapters Chapter 1 General Description This part explains product specifications and the how to service the unit safely. It is very important, so please read it. Polling reception Receives from a fax in automatic transmission mode. When the original data bit is 0, sent data bits are inverted; when the original data bit is 1, the value is retained. FAXL400 Left Side View DOCUMENT FEEDER TRAY Place documents for copying. ADF AUTOMATIC DOCUMENT FEEDER Holds documents for copying and feeds them automatically into the scanning unit. ADF AUTOMATIC DOCUMENT FEEDER Holds documents for copying and feeds them automatically into the scanning unit. DOCUMENT OUTPUT TRAY Documents come out here. LEFT COVER Open it when you. PLATEN GLASS Place documents for copying. OUTPUT TRAY Outputs printed pages. RIGHT COVER Open it when you install the cartridge, or remove jammed paper. Lights green when the reservation of fax transmission is set, or a fax is received into the memory. Connects to information services that accept tone dialling only, even if you are using a rotary pulse. Handling Precautions Do not throw cartridge into open flames, as this may cause the toner to ignite and result in burns WARNING or a fire. Some types of paper available at office supply stores may not be suitable for this machine. If you have any questions about paper and transparencies, consult your dealer or Canon Customer Relations. Scanner section Printer section Paper supply section Figure 21 Parts Layout.http://hylimusic.com/fckeditor/editor/filemanager/connectors/php/userfiles/bosch-power-tool-user-manuals.xml

Document sensor DS Document edge sensor DES Separation roller Pickup roller Paper guide Document eject roller Document feed roller Document feed motor CS drive motor Contact sensor Figure 24 Scanner section. NOTE The machine performs initialization when the power is turned on, and after a document is ejected. Pickup solenoid Pickup roller. Then, the pickup roller rotates, and a sheet of paper is fed into the printer section. This Laser light passes through the cylindrical lens to fall on the 4faced polygon mirror that is rotating at a fixed speed. The fixing section on this machine is an ondemand method that uses fixing film with low thermal capacity. The toner that was transferred to the recording paper at the toner transfer section is fused to the paper and fixed as a permanent image. Also, remove all cables connecting to the computer. Also, take care that personal accessories and hair, etc., are not caught in any moving parts. Also, never use any other than the specified type of grease. Otherwise, plastic parts and rubber parts may melt or be otherwise deformed. The discussions that follow are limited to those components that are thought to require replacement relatively more often than others. While lifting up the rear side of the document feed ass'y, shift it to the rear side for removing. Document feed assy Stopper Figure 35 Document Feed Section 4 8 Remove the document feed rear cover while detaching the 3 claws. NOTE Turning lever Release lever Stopper Figure 38 Document Feed Section 7 Check to make sure that the stopper lifts up the left side of the turning lever, and the right side of the turning lever pushes down the release

lever. Figure 318 Recording Section 8 16 Remove the 2 screws m, and detach the front stay ass'y and the manual paper feed guide plate. Front stay assy Manual paper feed guide plate. Sensor lever Claw Pickup roller holder Figure 320 Recording Section 10 18 Remove the separation pad with the flathead screwdriver.http://www.priom.com.br/userfiles/bosch-powerstar-ae125-manual.xml

Platen glass When black vertical stripes appear in copied or transmitted. REFERENCE 2.1 Main Unit Outer Covers Wipe any dirt off with a soft, dry cloth. Otherwise, paper dust may stick to the parts or a static charge may be generated. Store the toner cartridge in its original protective bag to avoid exposure to light. The document feed motor does not run. The document slips against the rollers. This is displayed when the document sensor detects paper, but the document edge sensor cannot detect the leading edge of the document with 15 seconds from the start of the feed operation. Solution 1 Replace the toner cartridge. 2 Check the connection the ECNT board J304. 3 Clean the primary bias contact on the ECNT board and cartridge contact. Solution Use Status Monitor to delete the current print job or the final print job If more than one jobs are being printed. Then you can shift to the next job. PAPER" Cause 1 Either recording paper run out or there is no recording paper cassette loaded. This is displayed when the recording paper sensor detects no paper. 2 Either recording paper run out or there is no recording paper multipurpose tray loaded. As for causes and countermeasures, only the error codes which are newly incorporated in the unit as well as which require remedies unique to the product are included in the item d. Cause The time until connection with the other fax is too long. Measure the resistance between the fixing unit connector J2062 FSRTH and J2061 GND. If the problem is solved by using the recommended paper, the customer should be advised to use the recommended paper and store it correctly. The document feed motor does not run. Evaluation criteria Check it visually. Transmissions may cause problems if one or more of the there is poor. Record or keep the items listed below. The process for carrying out communications at three points as shown in the figure.

Trouble FAXA FAXB FAXC Start A Your customers facsimile B Facsimile of other communication party C Facsimile for check in the same region. When problems occur with other manufacturer's facsimiles, make the user of the other party's facsimile call the serviceman in charge. Perform communication at the four points listed in the figure. Be sure not to use those switches not discussed herein; they are for use at the factory.The figure below shows which numbers are assigned to which bits. Each bit has a value of either 0 or 1. If "NO" is selected, the CI signal is not transmitted and the V.8 protocol is not used even if the DIS that specifies the V.8 protocol is received. Smallsize paper is counted for "1", while largesize paper is counted for "2". Level 1 Level 2 Level 3 Description COUNTER TOTAL total counter SERVICE1 total counter 1 for service. DRAM Test 1 writes data to the entire DRAM region and reads it out to check that operations are correct. In this test, various print patterns are output from the printer. As service print patterns, press the numeric key 2 from the Print Test menu to select "2 BLK". These tests test modem and NCU transmission and reception. The modem tests check whether signals are sent correctly from the modem by comparing the sound of the signals from the speaker with the sounds from a normal modem. The G3 signals below are sent from the modem using the modular jack and the speaker. In these tests, you can check whether the tonal signals and DTMF signals received from the modular jack are detected by the modem. These tests test the following faculties of this machine. Test type Overview Sensor tests Test whether the sensors are operating correctly. In this test, check that the display, LED lamps, keys and the sensors of onetouch speed dialing panel on the operation panel are operating correctly. HHHHHHHHHHHHHHHHHHHHH H pattern displayed HHHHHHHHHHHHHHHHHHHHH Press Start key. HHHHHHHHH All LCD dots displayed Press Start key.

67 OPERATION PANEL All LED lamps light on LED TEST Press Start key. Figure 426 System Data List 1 484. Figure 448 System Dump List 4106. Then output the list of changes made to the defaults of user data list and system data list.Figure 455 Print Spec Report 4114. Remove all tape and
