In addition: Nexus 10 also obtains the unofficial nougat update. Well, we don't see any launch of Hurdle Bloquing CM14 for LG G2, G3, G4 and LG V10. GAPPS (Google apps) is essential for each Android user who installed personalized recovery. Optimus more old devices such as Optimus G, L70, L90, etc., and the Galaxy S5 Mini also receives love for Nougat update through a Rom CM14.1 own also. And despite the fact that the nexus 10 cm14 has not arrived, we are sure that its moment will also arrive soon, now that a construction of App Android 7.0 for the Nexus 10 is live! Update "October 25, 2016]: Well, the Moto G4 and G4 Plus now have CM14 Cyanogenmod 14 ROM available. LINEAGEOS 14.1 continued where CM14.1 left it, and now, with the launch of the update of Android Oreo, the Rom Lineageos 15.0 is the one that will be based on Android 8.0. We have also added the Xiaomi Redmi 3 to the CM14 party. We are seeing small unofficial ports of the CM14 emerging window for different devices here and there. That is why the majority of Android professionals who will meet a Nexus, and not the last Samsung, LG, HTC, etc. flagship vessel, etc. Of course, the errors will be annulled, the problems and constructions will be stable in due time, but until then, you must be very, very cautious before installing the Update "October 27, 2016]: We are at the end of October, and there are still no official launch signs of CM14 or CM14.1 by the Cyanogenmod team. Besides, it is a birth of great. In addition, AICP is available for both variants of Léser Zenfone 2. Some developers have even started working in CM14 for few devices also: OnePlus 3 and Nexus 5x. As mentioned, Lineageos wins all its code directly from Cyanogenmod, so it is only a brand change instead of being a completely new version. Download Cyanogenmod 14 Android 7.0 Romsee has ordered the list alphabetically on behalf of the manufacturer. Also read: â ¢ nexus Z5 Nougat release oh by the way, did we tell you that Google Nexus, new or old devices will surely receive support cm14? We have divided this fairy long article into several parts, which are the following (you can jump to these sections from the widget of the council content table on the right side on the desktop, it is the same). Therefore, those 50 days, about 1 month and 20 days, or the CM team took the CM team to disburse its first construction of CM13 for selected devices, while most devices received the CM13 support only má¡ Late. Update [October 6, 2016]: Some good news for all LG G3 users! The Crdroid Rom brings Nougat's update is quite good for its device, either in Verizon Wireless, AT&T, T-Mobile, Sprint or in Korea or Europe. Keep the "Volume Down + Power" buttons until you see something on the screen. For those who have not received a stable release of Android 8.0 Oreo Lineageos 15 for their device, the best option is to execute Cyanogenmod 14 that transports Android Nougat. Therefore, it is true that we are completing the Fanics of the Rom Cyanogenmod Nougat, which is now for The basic concepts of development, something that Steve Kondik spoke yesterday, and very required. As we said before, the same project that took the CM14 to OnePlus 2 is now producing CM14.1 based on Android 7.1 for the device in its ROM version. So, if you want to use OnePlus 2 Android 7.1 Rom, now it is available. Find the official discharge link CM14.1 in the table of the device list, in the discharge section dedicated to continuing. Moto X Play still does not have CM14, or CM14.1 if you wish, but it simply received a great boost in the personalized firmware scene, thanks to the availability of AICP, which is one of the best alternatives CM14 in our eyes. G800F/m/And they are only compatible, while this is not clearly for G800H. Update "September 24, 2016): We still have to see an official custom CM14 personalized rom that comes out for any device, much less the 5x and 6p nexus, which are first to execute the glorious Rom CM14. Is your device now on the left panel of that web página, and has an available Rom CM-13 file? For one, the OnePlus sets are almost 100% for CM14: OnePlus One, OnePlus 2, OnePlus x and OnePlus 3. Discharge of Responsibility: Click Totch is not responsible for the day that your device finds when you follow these instructions.
