Reload to refresh your session. When it was created, the standard used for that time was used they took a serial car, extended the base, instead of the rear of the body a cargo compartment was applied and the rear suspension was reinforced. Initially, the Volkswagen Caddy was created exclusively as a truck wagon its interior was absolutely not adapted for the carriage of passengers. The car was made on the platform of the Golf model of the first generation, and in the appearance of much borrowed from Polo. For example, the front part of the body up to the door and rear view mirror. As an option on a pickup, a plastic top was mounted with or without a lifting rear wing. The engine is diesel, with only the most necessary options. He enjoyed great demand in Western Europe. Small firms, product retailers and other organizations that constantly ship small batches of goods or equipment were Caddy very satisfied. Such a Caddy was manufactured in the Czech Republic.

The world giants of the automotive industry presented new models that were designed not only for the transportation of goods, but also for passenger operations. Renault releases Kangoo, followed by Opel Combo and Ford Tourneo. Adhering to the trends of today's market and demand, Volkswagen in 2004 produces a new Caddy on the platform PQ35 from Golf V. The reliability, which became the card of the previous generation of Caddy, has found its continuation and in the new model. The cargo compartment on the new Caddy is now no longer separated from the driver's cabin by the step as it was in the second generation Caddy. At the same time, he has also grown significantly in all directions the width of 106 mm, the base of 81 mm, and the total length of 172 up to 4.4 m. The volume of the luggage compartment increased by 300 liters and reached a value of 3.2 cubic meters.

Buyers of both versions of Caddy are offered four different engines at once two gasoline, 1.4 l 75 hp and 1.6 l 102 hp, and two diesel engines 2liter SDI 69 hp and turbocharged 1.9 TDI 105 hp. Transmission, only mechanical. Additionally, an ESP antilock system can be ordered. The floor of the cargo compartment is made of sheet iron, which significantly increases its durability and protects against possible damage. In addition, the bottom edge of the cargo hole is a protective overlay, and the sidewalls of the cargo compartment are upholstered from below with a sturdy plastic, which eliminates the possibility of damage to the cabin. Access to the compartment is through the backstop rear doors or through the widest in this class of cars side sliding doors. The steering column is regulated in two dimensions, which makes driving a Caddy Kasten comfortable for any driver. Passenger and driver's seat have adjustable longitudinal position and tilt of the backrest. To create an excellent and comfortable microclimate in the cabin, there are systems of heating and ventilation with an antidust and antiallergenic filter.

<https://jointrilogy.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626f4ab0b123e---bosch-washing-machine-was28461au-manual.pdf>

Owners of gasoline engines will find on the panel an indicator of brake pad wear. Telescopic shock absorbers are equipped with a stabilizer of transverse stability. For braking, the reinforced hydrodynamic twocircuit braking system corresponds. His main advantage is transformation. If it's not possible to make a passenger van from Kasten, then Kombi is also. You just have to fold or completely remove the rear seats. Therefore, a passenger is called Kombi, which means "combined", that is, one that may be both. Here as well as on the Kasten combined suspension. Passive safety Caddy Kombi provides 4 airbags two front and two side for the driver and front passenger. All seats in the cabin are equipped with threepoint seat belts with vertical adjustment and ancillary couplings. Caddy is equipped with an additional signal of braking and fog lamps. Equipped with a glazed body and lifting rear doors. If desired, the car can be supplemented heated front seats and two electric windows. The cabin has plenty of space for small things that may be useful for passengers on the road. These are numerous shelves on the front panel, bulky boxes under the front seats and already traditional gloves. Well assume youre ok with this, but you can optout if you wish. More so, you will be able to handle servicing on your vehicle without passing through stress simply with the help of the information loaded in the service manual.
